

NEXTLAB™ Partnership Solutions

Bring Your Success Full Circle

Boston Scientific and Siemens Healthineers have partnered to improve access and affordability to capital through Boston Scientific's capital offset model and service through Boston Scientific's products.

Strategic
Partner

SIEMENS
Healthineers

- Improve access and affordability to capital through Boston Scientific's capital offset model
- Full suite of products
- Business Intelligence

OPTICROSS™ 18 Peripheral Imaging Catheter

The Opticross 18 IVUS catheter delivers confidence to guide complex lesions. The best in class deliverability enables crossing challenging lesions while providing exceptional image quality.

AngioJet™ Peripheral Thrombectomy System

The AngioJet Thrombectomy System is a pharmacomechanical peripheral thrombectomy device with active aspiration and Power Pulse™ lytic delivery designed to treat the widest range of thrombosed vessels, rapidly restoring blood flow.

Jetstream™ Atherectomy System

Jetstream is engineered to predictably treat multiple morphologies, such as calcium, plaque or thrombus, commonly found in total occlusions. As the only atherectomy system with active aspiration, Jetstream removes debris, helping minimize the risk of distal embolization.

Peripheral Rotablator™ Rotational Atherectomy System

Precise. Predictable. Proven. Experience the controlled precision of a diamond-tipped burr designed to modify vessel compliance in even the most calcified peripheral lesions. When it comes to atherectomy, trust the Rotablator System for proven patient outcomes

Siemens Healthineers

SOLUTIONS

- The best technologies for transforming care delivery
- Joint education and training options
- Long term contract structuring

Mobile C-arm Solutions

Built to be your partner in performance, the high-quality imaging and product flexibility of the Cios family of c-arms supports your vascular suite and your budget. Large power reserves with active cooling virtually eliminate overheating and costly delays. Streamline your procedures with full system control in the sterile field and a one-click vascular workflow initiation.

Fixed Angiography System

Our fixed systems for the outpatient interventional space are designed to give you the flexibility that you need while meeting your clinical requirements. The simplified user interface and positioning controls enable optimal patient access for complex procedures—all at a competitive price.

Ultrasound Solutions

Siemens Healthineers is ushering in a new era in ultrasound, dedicated to providing the best imaging for early detection, diagnosis and timely treatment of complex diseases. Virtually eliminate color flash artifacts with no user interaction for improved image quality and vascular workflow with patented Auto-Flash Suppression technology.

Siemens Financial Services (SFS)

Siemens Financial Services (SFS) is the financing arm of Siemens. SFS provides customers with services and solutions that make implementing healthcare solutions simpler. Our industrial expertise, paired with financial know-how, provides customers with access to a breath of solutions that offers clients a strategic advantage. Whether you're looking to conserve cash or credit lines, accelerate business or increase operational flexibility, we can help you achieve your goals.
